Lift lever to engage locking points, then one full turn of the cylinder to lock

To open from inside:

One full turn of the cylinder then push down on the lever to release

To open from outside:

One full turn of the cylinder, then push down on the lever to retract locking points, followed by a further turn of the cylinder to retract the latch

Handle Set

For suitable door handles see our door handles and accessories section on our website.

Please see lever/lever 92pz or lever/pad 92pz for handles that will fit this lock, and match up to your existing handle dimensions as close as you can.

Frame Keeps

For frame keeps please contact our technical department who will be able to assist you with finding the correct keeps.

Many are profile related and will need to be replaced with an almost identical product.
