

Yale® Keyless digital lock

Available from **DG Supplyline Ltd** - see overleaf for details

The New **Yale** Keyless Digital Lock.

Do you ever wish you could leave your house without having to take your keys with you?
With the new Yale Keyless Digital Lock you can do just that.
It replaces most 60mm nightlatches and the touch-screen pad gives you an easy and convenient way of opening your door.
All you have to do is remember your own unique pin number.

Touch Screen keypad

Similar to a smartphone screen, there are no mechanical buttons which means no trace of your secret pin code.

4-12 Digit Pincode

Choose any pin code from 4-12 digits in length, eliminates the use of keys and is ideal for the whole family - no more problems with lost keys!

Battery Powered

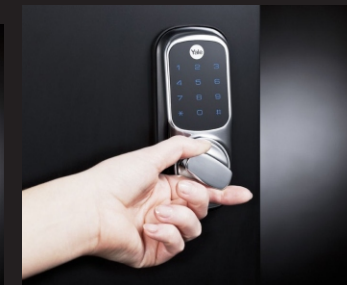

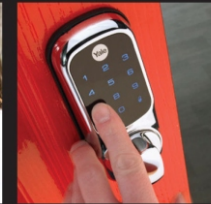

Runs on one set of 4 x AA batteries, which will last for up to 10,000 uses. A warning light will come on when the batteries reach a critical level. In the event that the batteries go flat there are contact points at the bottom of the unit which a 9V battery can be connected to in an emergency.

Weather Resistant

The keypad is designed to withstand UK weather conditions and has IP protection 5,5.

Flexibility

You can set up custom pin codes for various situations. Fake pins codes can be programmed to fool onlookers but will still allow you to gain entry. Temporary codes can also be set up to allow other people access to your home if required and can then be easily deleted.

Part Code: YKL01 **List Price:** £107.50 + vat

1 Palm Touch

2 Enter PIN Code 1234

3 Press * Button

4 Turn Handle
